/ ALL ABOUT ME

I bring over 2 years of frontend expertise encompassing HTML, CSS, JavaScript, Bootstrap, React JS, hooks, and MUI. I've developed applications from scratch and enhanced ongoing projects, leveraging strong frontend skills. I'm driven by continuous learning, constantly improving to enhance productivity. Each project fuels growth, offering novel approaches to overcome challenges efficiently. I'm committed to delivering top-notch code, exceeding expectations for client satisfaction. Beyond technical proficiency, I prioritize communication, collaboration, and teamwork for seamless project execution. With a dynamic approach and unwavering dedication, I'm ready to contribute impactful digital experiences and exceptional outcomes to new ventures.

/ TECH SKILLS

- HTML
- CSS
- Javascript
- React JS
- Typescript
- Redux
- RTL/Jest
- Bootstrap
- MUI
- Tailwind
- Figma
- GIT

/ EDUCATION HISTORY

>> RGPV University, Bhopal

Bachelor of Engineering (B.E), Civil Engineering

/ WORK EXPERIENCE

>> Junior Software Engineer

MetricStream | Apar Peopleworld | Sept 2022 to present

- Frontend Developer: Utilized React JS and React Hook Forms for seamless implementation of features in GRC product.
- Ensured optimal performance by integrating new features while maintaining existing functionalities.
- Collaborated with UI development team to translate Figma designs into functional web pages.
- Contributed to delivering a high-quality user experience through efficient frontend development.

>> Frontend Developer

Intain Technologies | Feb 2022 to Sept 2022

- Responsible for creating UI, implementing features, and enhancing functionality of web applications using React JS.
- Developed responsive and dynamic user interfaces that resulted in exceptional user experiences.
- Collaborated with designers using Figma, facilitating seamless implementation of their designs.

>> Intern

Nxtwave | Aug 2021 to Jan 2022

- Gained foundational understanding of web development, beginning with HTML, CSS, and Bootstrap for project creation during internship.
- Progressed to dynamic web design by mastering JavaScript, subsequently advancing to React JS and Hooks for building diverse applications, including authentication, authorization, and local storage functionalities.
- Expanded skillset by exploring Material-UI (MUI) and other essential libraries for creating comprehensive React applications.

/ TECHNICAL PROJECT

>> GRC Product | Sept-2022 to Present

Frontend Development Focus

- Primarily responsible for creating form templates and reports using React JS.
- Worked on the project with React Hook Form for managing forms and form inputs.
- Collaborated with UI development team.
- Integrated Redux for state management to ensure data consistency across components.

Contribution and Achievements

- Resolved 200+ issues and developed 20+ new features within a 2-year timeframe upon joining the organisation.
- Played a pivotal role in optimizing code and ensuring adherence to Prettier ESLint standards for consistent code styling.
- Utilized Jira for tracking and triaging issues, ensuring efficient workflow management and resolution of issues within the team.
- Added multiple unit test cases using Jest, validating the reliability and stability of the codebase.

>> Intain Market | Feb-2022 to Sept -2022

- Spearheaded the creation of a robust project using React JS and CSS, integrating interactive charts and a versatile dashboard.
- Collaborated closely with design team to implement diverse components across various routes, leveraging multiple packages for enhanced functionality.
